Report Period: Oct 23 - Nov 5

Summary of Progress in this Period

1. Finished interviewing users from the University of Iowa as part of our requirements-gathering process
 2. Started researching testing methodology for our project
 3. Started on our testing design document
 4. Started on the lightning talk about the testing design document
 5. Discussed design plans with our adviser, and started talking about more details regarding implementation
 6. Started creating proof of concept and screen visualizations (Figma) to share with client and user teams
 7. Scheduled end of semester Faculty Presentation
 8. Identified all portions of Design Documents that need revision
-

Pending Issues

1. Revising previous design documents: this is an ongoing tasks, as we continue to better understand our project
-

Plans for Upcoming Reporting Period

9. If possible, hold one more meeting with UI Team, specifically Dr. Ali, the head researcher
 10. Complete testing design document
 11. Complete and record testing lighting talk
 12. Continue discussing design and implementation plans with our advisor
 13. Continue with creating proof of concept and screen visualizations(Figma) to share with client and user teams
 14. Delegate revisions for previous design documents
 15. Begin preparation for end-of-semester presentation
-
